

# IIM Workshop Day 2017

## *"Managing Information in the Cloud"*

**29 November 2017**

**Margaret Whitlam Pavilion**

**National Arboretum Canberra**

## **Call For Papers**

### **About the Workshop Day**

The Institute for Information Management welcomes submissions for the IIM Workshop Day 2017 with the overall theme *"Managing Information in the Cloud"*.

Cloud computing is commonly used paradigm for the large-scale data storage and processing capability provided as a service, utilising a convenient and efficient access to configurable and flexible resources. The benefits of having your information systems in the cloud is remarkable, however governance, security and privacy concerns still have a noticeable impact on the adoption of cloud services in Australia. Organisations that utilise cloud-based services lose the direct control over the systems managing their information and business applications, thus introducing additional risks related to the confidentiality, integrity and availability of their key asset - information. The objective of this workshop is to bring together users, researchers, practitioners and cloud service providers together to discuss a range of topics closely related to the management of information in the cloud.

The Institute for Information Management seeks submissions from industry, academia and public sector, presenting case studies, practical experiences, new approaches, novel research, as well as experimental studies, outlining practical aspects of information governance in the cloud environment.

- Topics of interest include, but are not limited to:
- Information management in the cloud scenarios
- Cloud-based enterprise resource planning systems
- Data and business system security
- Integrity of Information in the cloud
- Data availability in Data-as-a-service scenarios
- Protection of Information in the cloud
- Efficient access to outsourced information
- Privacy
- Secure computation over encrypted data
- Security and privacy in crowdsourcing
- Security and privacy in multi-clouds and federated clouds
- Security and privacy with the Internet of Things
- Security and privacy of Big Data
- Security and privacy policies
- Selective information sharing
- Information in the cloud: threats, vulnerabilities and risk management
- Cloud-computing Implementation project management

# IIM Workshop Day 2017

## *"Managing Information in the Cloud"*

### **Important Dates**

Paper submission due: 2 October 2017  
Notification to authors: 10 October 2017  
Presentation slides due: 10 November 2017

Our Workshop Day will also provide an opportunity for a selected few solution providers to showcase their technologies, techniques and models that address common issues that information professionals deal with in managing their information assets in the cloud.

### **Workshop Day Host: The Institute for Information Management**

#### **IIM Mission: "To Inspire, Support and Encourage Australia to make the most of information"**

The Institute for Information Management (IIM) is a professional association that provides a space for information practitioners to discuss trends, share experiences and explore solutions that may benefit their business. The IIM attracts public and private sectors' members from a range of disciplines including information technology, information systems, web content management, documents and records management, knowledge management business intelligence and corporate performance management.

IIM branches support this purpose by hosting a range of activities including various communities of practice, breakfast seminars, vendor showcases and workshop days.

### **Paper Submission Guidelines**

Presenters are now being invited to submit abstract proposals in line with the Workshop Day theme. Submission of a paper should be regarded as a commitment that, should the paper be accepted, at least one of the authors will attend the Workshop Day to present the paper.

Papers must be clearly presented in English, must not exceed 8 pages, including tables, figures, references and appendixes.

Papers, slides and videos of the presentations will be published on the IIM's website. Selected papers will be published in the Workshop Day proceedings.

### **Program Development**

Abstracts for presentations will be selected by the Workshop day Program Committee. Criteria for selection of presentations will include innovation and relevance, experience, practical value and demonstrated results. Papers will be selected based on their originality, timeliness, significance and relevance to the overall Workshop Day theme and clarity of presentation.

Preference will be given to selecting abstracts that will stimulate discussion and advance the knowledge about the IM and IT industries. **Abstracts focusing on marketing a product or service will not be considered.**

The Workshop Day Program Committee keeps the right to select presentations that in their opinion address topics of interest to the IIM members. The decisions of the Workshop Day Program Committee will be final. Authors will be notified via e-mail of the result of their submission and if their paper has been accepted. Once abstracts are confirmed, it is expected that the presenter will submit their presentation material and attend the Workshop Day to deliver the presentation.

Abstracts to be presented will be made available to delegates as part of the Workshop Day Pack.
