**Overview**

After a very successful first seminar in this series, which was broadcasted over the internet and received fantastic feedback from the participants, the second seminar will include presentations that discuss ethical perspective of Artificial Intelligence and relevant initiatives and case studies.

We would like to invite you to provide a 20min presentation of your experience and perspective related to the overall theme of this seminar or a case study, which describes an example of a project that designed, developed and implemented a sustainable AI capability in an effective and ethically acceptable fashion.
